

HOW WE OPERATE

Our sales team has one point-of-contact with you, the customer. Our sales team works closely with our engineering team, ensuring all process and design requirements are met during the R&D stages. Our engineering team works closely with production, maintaining product requirements throughout all stages of production.

Our engineering team uses state-of-the-art 3D modeling software and 3D printing technology, allowing for a quick turn-a-round time from when an order is placed to first samples.

Masking Solutions
For
PW100 Series
Blades

SERVICE IS OUR MISSION

GRIT BLAST MASKING

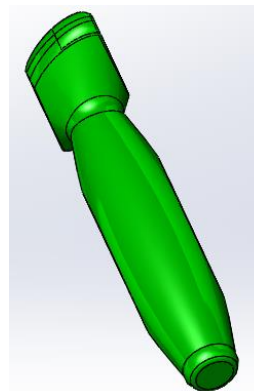

This hand-held masking solution is an ergonomic and reusable product that:

- Reduces cost by eliminating expensive tape
- Significantly saves time
- Increases process repeatability
- Provides a safe and comfortable method of handling blades

Custom masking is available to meet **ANY** requirements. Allow our application and CAD engineers create a mask for any process.

Approximately 17 cm in length and handle diameter of 3 cm.

Protects root while grit blasting along gas path.
